## One of Our Latest Northrop Looms

**W**E try to keep our advertisements up to date, and trust our customers will note the changes made in the following table since its first appearance.

125,000 looms sold or changed over to date.

Weavers earning more money at one-half former price per cut.  
Good weavers running 24 to 36 print looms and 20-3 harness looms.

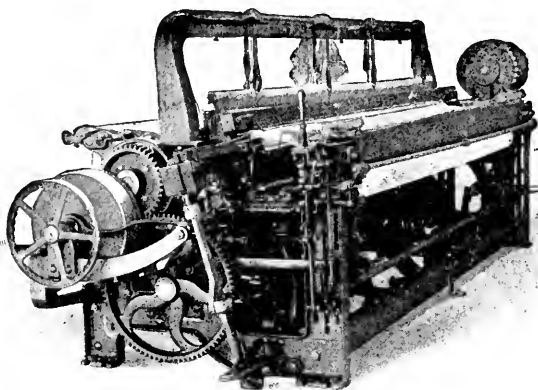

Gingham weavers running 6 looms with warp-stop motion.  
In one large mill the AVERAGE number of looms per weaver is twenty-four.

We have constantly increased the size and efficiency of our plant.

Separate corporations building these looms in England, Germany, France, Switzerland and Austria.

You can feel assured that merit is recognized when the copyist appears — but you don't want a copy.

# *Draper Company Products*

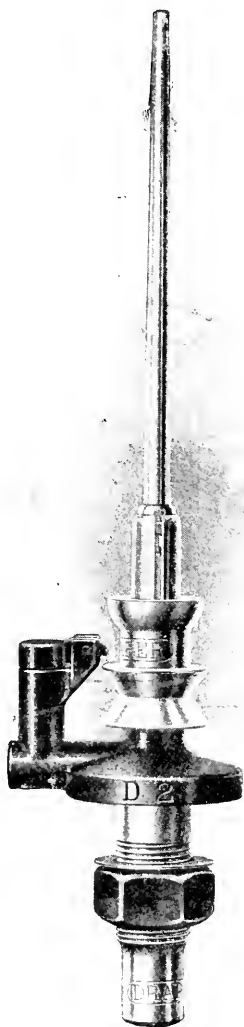

NEW BROAD LOOM.

Prominent Southern Manufacturers have privately admitted that the phenomenal growth of the Southern Cotton Manufacturing Industry is largely, if not wholly, due to the extensive use of the Northrop Loom in Southern Mills. They express great satisfaction since the Northern Mills were not so ready to recognize this great improvement. The Northern Manufacturers are steadily buying a larger share of our product, however, and will soon regain their lost ground.

The present record for Print Cloth woven on Northrop Looms is five and a half cents for fifty-two yard cuts—no extra help to fill hoppers. Production 100 per cent or more (due to letting looms run unattended during the noon hour).

# *Draper Company Products*

-----

We have by no means stopped manufacturing other Cotton Machinery simply because our Loom has become such an important factor in our business. We not only continue to make and sell

**Twisters,  
Warpers,  
Spoolers,  
Reels,  
Balling Machines,  
Spindles,  
Temples,  
Separators,  
Spinning Rings,  
Etc., Etc.**

But we continue to improve them. Our new Centrifugal Bobbin Clutch is shown at the left and we are filling large orders for this Improved Spindle.

We have recent improvements in Warpers and Balling Machines of great importance.

Our Rings are now made by an improved process and are better than ever.

We shall endeavor to keep the trade duly informed of new features by circulars.

# Kilburn, Lincoln & Co.,

FALL RIVER, MASS.

## LOOMS

For Cotton and Silk Weaving.

ALSO SHAFTING, PULLEYS AND HANGERS.

*The Kilburn, Lincoln & Co. High-Speed Loom.*

THERE are over 30,000 "High-Speed Looms" manufactured by Kilburn, Lincoln & Co. in successful operation in the city of Fall River alone, and many thousands more in other parts of New England and the South.

The light-running qualities of this loom and the consequent great saving in power, commend it to manufacturers. On account of the light-running feature, combined with strength, our loom is especially adapted to be run at High Speed. At the Seaconnet Mills, Fall River, 928 of these looms were in operation for a number of years at 204 picks per minute, turning out, in 301 days of 10 hours each, 14,329,219 yards 64x64 goods, a daily average of 51 3-10 yards per loom.

Of the other Fall River mills using our looms may be mentioned the King Philip, where 3,000 are in operation on the finest grades of cotton cloth. The Hargraves and Parker Mills, also, are fitted with our "New High-Speed Loom," manufacturing fancy goods, some of which are the finest produced in the country. The Arkwright Mill is operating 1,350 of our HEAVY PATTERN Looms. The new Davis Mill is equipped with about 1,000 of our TWENTIETH CENTURY PATTERN Looms.

We claim that the mills producing the largest quantities of goods per day, as well as those producing the finest quality of goods, are running our looms.

*We are building our High-Speed Looms with the Northrop continuous filling and warp-stop motions attached.*

## THE BRAMWELL SELF-WEIGHING FEEDER.

For Woolen, Worsted, Hosiery and Shoddy Cards and Garnett Machines.

We began introducing this feeder more than twenty years ago and its use is now practically universal. Many other types and makes have been tried and discarded, but the Bramwell, in its improved and up-to-date form, is now recognized everywhere as the most perfect feeder and only complete feeding machine in the world.

Our long experience has proved conclusively that where evenness is required — determined by weighing — our weighing feature is absolutely indispensable. Several attempts have been made to introduce feeding machines ignoring this principle, but none have succeeded.

We have made a careful study of all phases of the feeding problem and by adaptations and modifications of the Bramwell Feeder to meet the particular conditions, are prepared to feed evenly all kinds of stock from rabbit's fur to jute tow, including shoddy, cotton, fine wool, mixtures, fine and coarse worsted, flax tow, long worsted and all other kinds of stock.

## THE APPERLY FEEDER.

For Second Breaker and Finisher Cards.

This machine was originally brought to this country and introduced against great opposition by the founder of this concern, the late Geo. S. Harwood. Today there are about 15,000 machines of our construction running in this country and Canada. We have greatly improved the machine. It is today an efficient, positive and up-to-date feed, and we can offer manufacturers the choice between the Kemp positive geared traveler and the Standard traveler with all other recent improvements.

## THE BRAMWELL PICKER FEED.

For Burr Pickers, Mixing Pickers, Fearnoughts and Lumpers.

We consider our improvements in picker rooms of the utmost importance for up-to-date manufacturers. In fact, wide awake manufacturers are more and more realizing the wisdom of bringing their stock to the card room in a better state of preparation. Hand feeding is becoming a thing of the past in the picker room as in the card room. The latest Bramwell Picker Feed is built to handle all kinds of stock in any quantity with evenness and without injury to the staple. The extensive introduction of our feed in first-class picker rooms has led to the successful introduction of

## THE SPENCER AUTOMATIC STOCK OILING MACHINE.

This is a modern device for oiling the stock automatically on its way to the picker from the Bramwell Picker Feed, superseding the wasteful, dirty method heretofore in use. Because of the accuracy of this method and the fact that the oil goes on the stock only (instead of the floor and walls) there is a large saving of oil, and the stock is at the same time more evenly oiled and much better prepared for the carding process.

## THE MODERN BRAMWELL FEED FOR WOOL WASHERS AND WOOL DRYERS.

The scouring and drying of stock is today recognized as a very important part of the manufacture of textiles, especially in worsted mills. Our feeds are recognized as the standard for properly feeding stock in the grease or wet stock with absolutely no injury to the staple, with evenness and in sufficient quantity and in the best possible condition for economical scouring. There have been other feeds offered for this class of work, but after clogging up and giving all kinds of trouble most of them are today in the scrap heap, having been replaced with our feeders.

## REPAIRS AND IMPROVEMENTS FOR OLD FEEDERS.

We have not been standing still all these years and the feeders we are building today are modern and up-to-date, but these improvements and attachments can be placed on older feeders of our construction, greatly to their benefit. We do not hesitate to claim that **no outlay will show a greater return** to a manufacturer than money spent in bringing your Bramwell and Apperly Feeds thoroughly up-to-date.

## APRONS OF ALL KINDS.

We build about thirty different styles of spike aprons adapted to the various kinds of stock our feeders are called upon to handle. Our policy is and will be to put into our aprons the best materials and workmanship money can buy. We know we could make cheaper aprons by using cheaper materials and less expensive labor and it would take manufacturers some years to find us out. The apron would LOOK nearly as well but would WEAR only two or three years instead of from five to ten or twelve. Do not trust the man who says he can sell you aprons cheaper than we can. He can do it (and so could we) but you pay the bill in the end. The best is none too good and is the cheapest in the long run.

Call on us for particulars and information about all matters relating to Feeding Machinery.

# The Bell System of Humidification

Produces and automatically maintains throughout the year the uniformity of conditions that every textile manufacturer desires and now finds it so hard to realize. These conditions he can never get by squirting steam or water into his rooms and trusting to luck.

The whole trend of modern manufacturing is toward trusting more in the machine and less in the man. For this reason all auxiliary apparatus should be as nearly automatic as is possible.

*The Bell Humidifier* delivers air carrying moisture as aqueous vapor, just as it is found in nature, which moistens thoroughly and uniformly. Being SELF-REGULATING, it does not keep on moistening when further moistening is useless or harmful.

## Patent Grids

For Cotton Openers and Lappers

"PRODUCES  
MORE YARN  
AND BETTER"  
is the verdict  
of all users

Cotton Mill Stock  
Quotations Show  
19 1-2% Increase  
where these Grids  
have been adopted

### We Guarantee These Results:

Cleaner Yarn. Evenner Yarn. Often 2% to 5% less twist required. Usually 1-2 to 1% cotton saved from Picker waste. Save 2% clean waste throughout mill, which does not require working over at double expense.

We have in our possession hundreds of testimonials from mills in the United States and throughout the world. Our best guarantee is the offer to ship our GRID to you on a thirty-day trial, freight prepaid, and have it fixed to one section of your lappers complete by one of our own expert fitters, at our own expense. Write for complete literature regarding this money saver.

# *The Barrett Specification*

**T**IN, which is the most popular of metal roofs, is seldom used on large or important work. The reason for this is the well-known fact that the cost of painting and repairing, necessary to keep a Tin Roof tight for a period of ten years, is **MORE** than the **TOTAL COST** of a **BARRETT SPECIFICATION ROOF**.

A Roof laid according to this Specification will cost **NOTHING** for maintenance during that period, because any reputable contractor will give with same an absolute guarantee covering ten years.

As an investment, it can be quickly calculated that a **BARRETT SPECIFICATION ROOF**, at its market price, is cheaper in ten years than a tin roof costing nothing to start with.

*Booklet covering the entire roofing subject free on request.*

# EVAN ARTHUR LEIGH,

232 SUMMER STREET, - - BOSTON, MASS.

Sole Agent in the United States and Canada for

**PLATT BROTHERS & COMPANY, Ltd.,**  
*Of Oldham, England*

by far the largest makers in the world of

## Cotton, Woolen & Worsted Machinery

FOR ALL CLASSES OF WORK.

MATHER & PLATT'S Dyeing and Finishing Machinery.

JOSEPH SYKES BROS'. Card Clothing for Cotton.

CRITCHLEY'S Card Clothing for Woolen and Worsted.

GEORGE HODGSON, Ltd., Looms for Worsteds, Etc.

TEXTILE MACHINERY ASSOC., Ltd., Flax, Hemp, Jute, Etc.,  
Machinery.

THE PATENT AUTOMATIC FEEDING MACHINE CO., Feeders  
for all Fibres.

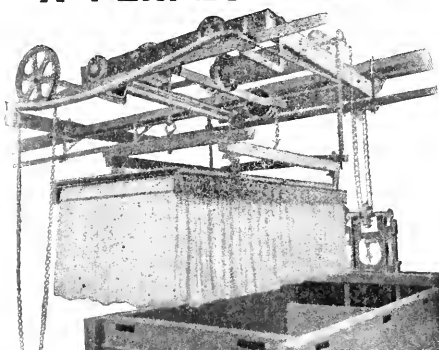

DRONSFIELD BROS'. Grinding Tackle and Emery Fillet kept in stock.

WILSON BROS. BOBBIN CO., Ltd., Bobbins and Shuttles.

## The Hussong Dyeing Machine

Patented Nov. 6, 1900. April 9, 1901. Nov. 29, 1904,

### A PERFECT SKEIN DYEING MACHINE.

This illustration shows our Compressed Air Hoisting Carriage, with 300 pound Yarn Machine suspended.

Points of Superiority Which We  
Claim for the Hussong Machine.

Durability, Even Dyeing,  
Saving of Steam, Saving  
of Dyestuff, Saving of 75%  
In Labor, Makes No Waste  
Whatever, No Friction on  
the Material. Requires  
but Little Power to Oper-  
ate. Leaves the Yarn and  
Slubbing in its Natural  
Condition.

Built by the

## AMERICAN DYEING MACHINE CO.

Office, 609 Pearl St.

CAMDEN, N. J.

# BUYER'S INDEX

FOR

## Machinery and Mill Supplies

The following Classified Index contains the addresses of the principal builders of Textile Machinery, and Dealers in Mill Supplies. If any particular machine or article wanted is not specified, the publishers of the Textile World Record will be pleased to tell where it may be had.

IN WRITING PARTIES PLEASE MENTION THE OFFICIAL AMERICAN TEXTILE DIRECTORY.

### Acids.

Foster, Edward C., Providence, R. I.  
(See ad.)

### Air Moistening System.

American Moistening Co., Boston. (See ad.)

Bell Pure Air & Cooling Co., New York. (See ad.)

Cloth Cutting Machines for All Purposes

TEXTILE  
MACHINISTS

A Sketch showing essential features of a "Cloth Splitter"

## SPECIAL MACHINES.

Every manufacturer has his own special problems. If these problems relate to **Cloth Cutting** in any way, shape or form, we are always glad to volunteer our help in solving them.

There is no problem in economic cloth cutting that has not a practical solution.

# Consolidation of Textile Directories

The LORD & NAGLE COMPANY, publishers of the ANNUAL OFFICIAL DIRECTORY OF THE TEXTILE INDUSTRIES, has bought the AMERICAN TEXTILE DIRECTORY, and this present edition combines the two works. The special features of each are retained.

The experience of combining and consolidating a number of textile publications, particularly the consolidation of the TEXTILE WORLD and the TEXTILE RECORD some years ago, convinces the publishers that what the textile trade wants is fewer publications of a high standard: quality rather than quantity.

We believe this consolidation of textile directories will be welcomed and endorsed by the users and advertisers of both of the former publications.

The combined directory is now known as

**T H E**

## Official American Textile Directory

As publishers of the TEXTILE WORLD RECORD this company has unequalled facilities for compiling a Directory and doing it promptly by personal canvass. It maintains seven or eight outside men exclusively in its employ among the mills and the trade. THE AMERICAN DIRECTORY did not have these facilities. The size of page is that of the OFFICIAL DIRECTORY, which has been found of greater convenience to the greatest number, the amount of information given has been increased, and its accuracy is of the highest possible standard. The textile map feature, originated in the OFFICIAL DIRECTORY has been retained. It is published in two editions, viz.: the Office Edition, price \$3.00, and the Travelers' Edition, with thin paper and flexible binding, price \$2.00. The combination price for the TEXTILE WORLD RECORD and DIRECTORY will be \$3.00 per year with the Travelers' Edition, and \$4.00 per year with the Office Edition.

### REWARD !

To the person who shall *first* inform us of any cotton, woolen, knitting, silk, flax or jute mill, print works, dyeing (except job dyeing), bleaching or finishing establishment in the United States or Canada\* which was in operation on May 1, 1906, and which is erroneously omitted from this Directory, we will give \$1.00 in cash, or credit same on subscription account, as he may prefer, subject to the following conditions:—

Full and complete information concerning the mill must be sent. By that we mean the name of the company, where located, names of the officers, including superintendent, class of goods made, capacity in machinery, that is, number of spindles, cards, looms, etc., kind of power, whether a dyehouse or not, name of buyer and selling agents.

We will pay the same reward to the first person who informs us of any mill reported as a going concern, which was out of business May 1, 1906.

In recognizing claims for reward, we can only consider them with reference to the circumstances on May 1, 1906, as it is manifestly impossible to include or omit mills which may have started or stopped subsequent to date of compilation.

We especially invite the co-operation of travelling salesmen in the correction of any errors that they may discover.

No other Directory publishers have yet dared to offer rewards for the discovery of inaccuracies.

\*The offer of reward does not apply to small custom carding mills with only one or two custom cards for country rolls, or one or two looms, or to knitting mills with less than four power machines.

## EXPLANATIONS OF MAPS.

---

The Directory is illustrated by copyrighted maps of the principal manufacturing states east of the Mississippi River, and the Provinces of Quebec and Ontario, showing the location of the textile mill cities and towns. These maps are engraved especially for the OFFICIAL AMERICAN TEXTILE DIRECTORY, and are arranged with special reference to the convenience of those desiring to reach the textile establishments. The Southern, Western, and Central States are arranged in groups; most of the New England and Middle States are shown with separate maps for each State. Under each State heading at and top of right hand pages reference is made to the page of map for that State. The maps are revised annually and brought up to date.

The State maps are divided into square sections, designated by letters and numbers. In the body of the Directory, after the name of the city or town, the square in which it is located on the map is designated thus, in the case of Passaic, N. J.—“Passaic, D-9;” meaning that Passaic will be found in the horizontal section D and the vertical section 9 of the New Jersey map.

Following the letters indicating the location of the town will be found abbreviations of the railroad connections, which will enable one to refer intelligently to any railway guide for his train connections. If the town is not on the railroad, the nearest railroad station is given and the distance from it. The population of the place follows the railroad abbreviations.

It should also be carefully noted that each square is a certain number of miles. Under the title of each map will be found the scale of miles to each square in that map. In this way distances can be very closely approximated, and railroad fares estimated on computation of about 2½ cents per mile in the Eastern States, and 3 to 4 cents in Southern and Central States, for local travel.

The classification of the following section of the Directory is first, alphabetically by States; second, alphabetically by towns and cities in each State; third, alphabetically by name of mill, under its proper post office address. In some instances the railroad and freight station is not the same as the post office address, and in these cases the proper railroad station is designated.

Under each city or town are grouped *all* the textile mills in that place, without regard to kind of goods made. The kind of mill, i. e., whether cotton, woolen, etc., is shown by the bold face letter at the right.

## EXPLANATION OF ABBREVIATIONS.

---

In order that the general character of the mill may be ascertained without closely reading the data concerning it, a system of abbreviations has been employed as follows:—

|                             |                                 |                                      |
|-----------------------------|---------------------------------|--------------------------------------|
| <b>C</b> means cotton mill. | <b>W</b> means woolen mill.     | <b>S</b> means silk mill.            |
| <b>J</b> means jute mill.   | <b>K</b> means knitting mill.   | <b>D</b> means dyeing establishment. |
| <b>Bl</b> means bleachery.  | <b>F</b> means finishing works. | <b>Pr</b> means print works.         |
|                             | <b>Fl</b> means flax mill.      |                                      |

These abbreviations are placed at right of column, so as to avoid confusion.

**POWER.** The kind of power is designated—steam or water.

**DYE.** If the mill has dyeing facilities, the word “dye” is used.

**S. AGTS.** means selling agents. The other abbreviations will be easily understood.

**BUYER.** In most instances the name of the man who does the buying is given for the larger mills. In smaller mills, or those operated by individuals, the principals usually buy.

**Pop.** Population.

## LATE ADDITIONS AND CORRECTIONS.

received too late for classification will be found by reference to the Table of Contents.

## ALABAMA.

There is profit selling cheap machinery at cheap prices, but we would rather have the profit from selling better machinery at better prices. DRAPER COMPANY, Hopedale, Mass. Southern Agent, J. D. Cloudman, Empire Bldg., Atlanta, Georgia.

# Wonalancet Company

NASHUA JUNCTION, N. H.

MANUFACTURERS OF

A SUPERIOR QUALITY OF

GULF AND PERUVIAN

## CARDED COTTON

IN THE WHITE—FOR WOOLEN MILLS

The high reputation of "WONALANCET" Cottons is due to the great care taken in grading the raw cotton ensuring uniformity—constant supervision during manufacture to produce clean carding free from "neps"—and to the unusually loose condition in which it is baled.

Evenness—Uniformity—Cleanness

Silk Extracts

Cut Logwood  
and other Dyewoods

Natural Indigo

AMERICAN MADE GOODS FOR AMERICAN CONSUMERS

# What are the Results?

Mr. Mill Man, how much thought and consideration are you giving to the scouring of your wool and cloth?

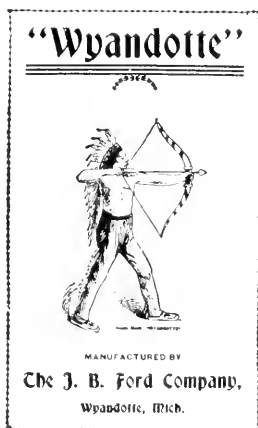

You consider carefully the subject of wools and their value so that you may know what wools best suit your purpose and what is a reasonable price to pay for them.

You study the process of their manufacture into yarn or cloth, but do you give the same careful thought to the scouring process? Have you considered the scouring process a simple matter, so simple, in fact, that you have not thought much about it?

BUT — is not the permanent injury of the delicate wool fibre or the impairing of its natural properties a very costly matter?

Strong alkalies (soda ash and pure alkali) as scouring materials take from the wool its life, its elasticity, leaving it harsh and dead — they cheapen its quality.

## *Wyandotte Textile Soda*

is especially prepared for scouring wool and cloth. It has none of the injurious properties of strong alkalies, yet at the same time excels them in detergent properties.

Wool and cloth scoured with Wyandotte Textile Soda retain all of their natural softness, whiteness and liffiness.

*Write us to come  
and show you.*

**The J. B. FORD CO., Sole Manufacturers,  
WYANDOTTE, MICH.**

**This Soda was awarded the highest prize — Gold Medal — at the St. Louis  
and Portland Expositions.**

## A HANDY BOOK FOR DESIGNERS AND WEAVERS.

# Manual of Weave Construction

By IVO KASTANEK,

Arranged by Samuel S. Dale, Editor of the Textile World Record.

In this book all the foundation and derivative weaves for harness looms are systematically classified and explained.

The weaves are divided into three general classes, plain, twill and satin. Under each of these divisions are given rules for constructing derivative weaves, which are illustrated with over Five Hundred Drafts, Diagrams and Illustrations of cloth samples.

For self-instruction the workers in the mill find it of great value and as a book of reference it is equally well adapted for the practical weaver, designer and the superintendent.

*There are over Five Hundred Illustrations and Diagrams, many showing the cloth with weave construction.*

Over One Hundred Pages. Handsomely Bound in Green Cloth and Gold. Price, \$1.50.

### PHILADELPHIA AND SUBURBS.

(Pop. 1,293,697.)

See maps on pages 226, 228, 230, 232, 234, 236.

*Pennsylvania, outside of Philadelphia and Suburbs, is classified separately and follows Philadelphia.*

Under the general head of Philadelphia are included all textile establishments, not only in the city proper, but in the local districts of Manayunk, Frankford, Kensington, Germantown, Bridesburg, West Philadelphia, Port Richmond, and Nicetown.

These establishments are arranged in alphabetical order, regardless of location or kinds of goods made. The street address is given and the district mentioned. When possible, the approximate location of each mill is determined by designating the map and square in which it is located.

**Map A** is a "skeleton map," showing the general location of the different mill districts, some of the principal streets and avenues, and railroads. It gives a general idea of the city, without attempting to show the streets. This map is the basis of the enlarged sectional maps which follow. Certain squares, embracing the most populous mill districts, have been enlarged in maps B, C, D, E, and F. These maps do not cover the whole city, but they do cover the majority of the mills. There are, however, quite a number of mills outside the sections embraced in the maps, and these mills have no map and square number.

**Map B** shows the principal down town business section.

**Map C** shows the Kensington and Richmond districts.

**Map D** shows a large part of Germantown.

**Map E** shows Frankford and vicinity.

**Map F** shows Manayunk, Fall of Schuylkill, etc.

**The Abbreviations** used are the same as in other parts of the directory.

The Directory of Philadelphia and suburbs has been compiled especially for the **TEXTILE WORLD DIRECTORY**, by thorough personal canvass. The Publishers will esteem it a favor to be informed of any inaccuracies that may be discovered, or of any changes that may occur after publication.

**ABBOTT MFG. CO;** Hancock & Mascher (**W**) Sts.; Geo. Sidebotham, supt; Worsted Dress Goods and Men's Wear; 12 looms; steam; sell direct; George Sidebotham, buyer; buy 2/20 up to 2/40 worsted, 2/16 cotton yarns.

Banco de Zacatecas. (Pop. 40,000.) GARCIA, JOSE M.; (Fab. La Zacatecas); (W Woolen Goods.

There is profit selling cheap machinery at cheap prices, but we would rather have the profit from selling better machinery at better prices. DRAPER COMPANY, Hopedale, Mass. Southern Agent, J. D. Cloudman, Empire Bldg., Atlanta, Georgia.

# The Textile Industry

Many machinery and power equipment advertisers do not appreciate the importance of the textile trade, and how much it buys besides strictly textile machinery. According to the twelfth census the aggregate motive power employed in manufacturing establishments was approximately 11,300,000 horse-power. Of this total, 1,885,000 horse-power is employed in the textile industry; that is to say, about one-sixth of the total power employed in manufacturing establishments is in the industry covered by the *Textile World Record*. This is larger than any other single interest. The

## Textile World Record

is the oldest and most influential journal in this field. Of the 400 advertisers using it, nearly 200 *advertise in no other textile journal*. It is a "gold-mark" paper.

When an advertiser is not familiar with this field, we study the case, make suggestions, prepare his copy from a textile standpoint, and help him to make his advertising profitable. We have succeeded in many cases where the advertisers formerly knew nothing of the textile mill trade, and thought there was nothing in it for them.

*We should like to send to interested parties the booklet "The Textile Mill Trade and How to Reach It," and also a copy of the "Textile World Record."*

# ALPHABETICAL INDEX

—TO—

## The Textile Establishments

### OF THE UNITED STATES.

The following index is an alphabetical arrangement of all the textile establishments in the United States. Following the name and address of the establishment, the character of the mill is designated by letters; thus,

(C) means a cotton mill      (K) means a knitting mill      (Bl) means a bleachery  
(W) means a woolen mill      (Fl) means a flax mill      (F) means finishing establishment  
(S) means a silk mill      (D) means a dye works      (J) means a jute mill

The number which follows indicates the page upon which the full particulars of the mill will be found.

It frequently happens that an establishment is listed under two names; viz., proprietor's and company's name and also the name of the mill, as, for example, Long Bros. Co., The Quaker City Mills, Philadelphia, Pa. In the alphabetical index this is listed as follows: Long Bros. Co., (Quaker City Mills) Philadelphia, Pa., also under the head of Quaker City Mills (Long Bros. Co.), the page number being given in both instances, but in the case of the second name the address is not given, so that if this index is used for addressing purposes, no duplicates will be made if directed only to the names which *have addresses*.

As the body of the Directory is arranged alphabetically by states, towns and establishments, it is, therefore, self-indexing, and any mill can readily be found through one or the other system of classification, viz., by its name in the alphabetical index or by its location in the body of the book, where full particulars about each mill will be found.

# The Yarn Trade Index.

In this department will be found classified lists of manufacturers of different kinds of yarn, who sell their product. So far as possible the sizes of yarn which are made are given and the form in which the yarn is put up, together with the selling agents of the mills. Dealers and commission merchants are not included in this list. There is a separate list following the list of yarn manufacturers in which are included such firms.

The publishers shall be pleased to receive a notice of any corrections that should be made.

Owing to lack of space, mills are not always included under every heading under which they should appear. So far as possible they have been listed under the heading which is their principle line of business, or for which they have expressed a preference.

If any kinds of yarn are wanted which are not found in these classified lists, the publishers can probably supply the addresses of manufacturers or dealers from which they can be obtained.

## COTTON KNITTING YARNS.

BY

PERCY BEAN, F.C.S., M. Ph.S.,

Expert on Sizing, Dyeing and Finishing. (Author of "The Chemistry and Practice of Sizing.")

AND

WILLIAM McCLEARY,

Practical Demonstrator in Bleaching, Dyeing and Finishing at the Manchester  
School of Technology.

It has been more than fifteen years since a complete treatise on this subject has been offered to the Trade, and during that time there have been wonderful advances made in the Chemistry and Practice of Bleaching and Finishing.

The authors of this book have exceptional qualifications for the work. It was compiled at the request of many of their clients soon after the publication of Mr. Bean's work on Chemistry and Practice of sizing.

The advance orders and subsequent sales in Great Britain and the Continent since its publication in the Autumn of 1905, have been so great that the American Trade could not be supplied until recently.

We have been appointed sole American Agents and have received a small invoice for immediate delivery.

We recommend the book as being worth the price.

Owing to the limited available supply, we suggest that those who are likely to want a copy should order at once and avoid a long delay.

Full descriptive circular sent free on request.

The size of book 6 x 8½. 572 pages. 38 diagrams. 37 illustrations. 18 plates. 45 cloth pattern cards.

**Price, Express Prepaid, \$15.00.****SOLE AMERICAN AGENTS, LORD & NAGLE COMPANY**

# Supplements to this Directory

Each month's issue of the Textile World Record contains a carefully classified record of new mills, enlargements, improvements and changes. The December number of the Textile World Record contains the Annual Report of New Mill Construction and important changes for the year. As this is issued six months later than the directory it forms a semi-annual supplement.

The combination price of \$3.00 covers the cost of the Directory (travelers' edition) and a year's subscription to the Textile World Record.

## Textile Advance News

Machine builders and others selling the textile mill trade who desire early and more complete investigated information of projected new mills, enlargements and improvements, changes, etc. (in most instances before orders are placed), can obtain it through the TEXTILE ADVANCE NEWS, at \$15.00 per year.

Established nineteen years ago, this the original textile news service is the most complete, systematic and accurate of any.
